Risk-free. Refinancable. Stress-free.

We handle the strategic recruitment for you, as well as the migration and integration of trainees from both domestic and foreign backgrounds.

WORK IN CARE – Our Services for You

Together with our partners, we have committed ourselves to combat the shortage of skilled workers. For this, we recruit and accompany qualified international trainees to Germany using our proven method.

We coordinate the applicant selection process according to your needs and, if desired, take care of the basic integration in Germany - ensuring everything works correctly from the beginning - without any risk to you.

Our Process:

1. We handle the application process and introduce you to qualified candidates
2. After a contract is concluded between the sponsor and the applicant, we handle the entry formalities with the district government
3. We assist the applicant in finding accommodation
4. If desired, we accompany you and your trainee after successful entry throughout the training period, and assist with further coordination and integration, such as organizing appointments with authorities.

The selected students come from Morocco, Iran, or the Balkans. All of them have prior knowledge in care through various internships, and all possess a language level of B2 to C1.

Your Benefits

- ✔ **Selection Process & Supervision**
The basic service includes the selection process, complete handling of the visa procedure, coordination with embassies, authorities, and schools, as well as supervision and basic integration work.
- ✔ **Refinancing**
We charge a supervision fee, which is refinanced through the compensation fund of the nursing profession training.
- ✔ **Security & Stress-free**
You incur no initial costs before the start of training – we take on the risk of timely commencement of the training.
- ✔ **Fair and Transparent**
Only visa and flight costs arise for the prospective trainee.

Find top-tier trainees and
meet your staffing needs!
